Preface xiii

<b>1</b>	<b>Oil-Field Casing.....</b>	<b>1</b>
1.1	Introduction	1
1.2	Setting the Standards	2
1.3	Manufacture of Oil-Field Casing	2
1.3.1	Seamless Casing	2
1.3.2	Welded Casing	3
1.3.3	Strength Treatment of Casing	5
1.4	Casing Dimensions	6
1.4.1	Outside Diameter	6
1.4.2	Inside Diameter and Wall Thickness	7
1.4.3	Joint Length	7
1.4.4	Weights of Casing	8
1.5	Casing Grades	9
1.5.1	API Grades	10
1.5.2	Non-API Grades	12
1.6	Connections	12
1.6.1	API 8-rd Connections	14
1.6.2	Other Threaded and Coupled Connections	15
1.6.3	Integral Connections	15
1.7	Strengths of Casing	16
1.8	Closure	17
1.9	References	17
<b>2</b>	<b>Basic Calculations and Hydrostatics.....</b>	<b>19</b>
2.1	Introduction	19
2.2	Units of Measure	21

2.2.1	Weight and Mass in Oil-Field Context	22
2.2.2	Standard Gravity	24
2.2.3	Fluid Density	25
2.2.4	Units in Formulas and Equations	25
2.2.5	Significant Figures, Rounding, and Computers	28
2.3	Fluid Statics	32
2.3.1	Hydrostatic Pressure	33
2.3.2	Buoyancy and Archimedes' Principle	36
2.4	Oil-Field Calculations	46
2.4.1	Hydrostatic Pressures in Well Bores	47
2.4.2	Buoyed Weight of Casing	57
2.4.3	Buoyed Weight of Casing in Inclined and Curved Well Bores	65
2.4.4	The Ubiquitous Vacuum	75
2.5	Closure	75
2.6	References	76
<b>3</b>	<b>Casing Depth and Size Determination .....</b>	<b>77</b>
3.1	Introduction	77
3.2	Casing Depth Determination	77
3.2.1	Depth Parameters	77
3.2.2	Conductor Casing Depth	89
3.2.3	Surface Casing Depth	91
3.2.4	Intermediate Casing Depth	91
3.2.5	Setting Depths Using Pore and Fracture Pressures	92
3.2.6	Casing Size Selection	96
3.2.7	Well Bore Size Selection	97
3.2.8	Bit Choices	100
3.2.9	Alternative Approaches	101
3.3	Closure	101
3.4	References	102
<b>4</b>	<b>Casing Load Determination .....</b>	<b>103</b>
4.1	Introduction	103
4.2	Casing Loads	103
4.3	Collapse Loading	105
4.4	Burst Loading	106
4.5	Surface Casing	108
4.5.1	Surface Casing Collapse Loads	108
4.5.2	Surface Casing Burst Loads	109
4.5.3	Surface Casing Load Curves	110
4.6	Intermediate Casing	113
4.6.1	Intermediate Casing Collapse Loads	113

4.6.2	Intermediate Casing Burst Loads	114
4.7	Production Casing	124
4.7.1	Production Casing Collapse Loads	124
4.7.2	Production Casing Burst Loads	124
4.8	Liners and Tieback Strings	128
4.9	Closure	130
4.10	Reference	131
<b>5</b>	<b>Design Loads and Casing Selection .....</b>	<b>133</b>
5.1	Introduction	133
5.2	Design Factors	134
5.3	Design Curves for Collapse and Burst	135
5.4	Preliminary Casing Selection Process	142
5.4.1	Selection Considerations	142
5.5	Axial Loads	154
5.5.1	Axial Load Considerations	154
5.5.2	Types of Axial Loads	156
5.6	Collapse with Combined Loads	161
5.6.1	Combined Loads	161
5.6.2	Simplified Method	162
5.6.3	Better Simplified Method	165
5.6.4	Historical API Method	167
5.6.5	New Combined Loads Formula	172
5.7	Additional Consideration—Cost	176
5.8	Closure	176
5.9	References	177
<b>6</b>	<b>Running Casing.....</b>	<b>183</b>
6.1	Introduction	183
6.2	Transport and Handling	183
6.2.1	Transport to Location	183
6.2.2	On Location	183
6.3	Pipe Measurements	185
6.4	Crossover Joints and Subs	185
6.5	Running the Casing	186
6.5.1	Getting the Casing to the Rig Floor	187
6.5.2	Stabbing	187
6.5.3	Filling the Casing	187
6.5.4	Makeup Torque	188
6.5.5	Thread Locking	188
6.5.6	Casing Handling Tools	190
6.5.7	Running Casing in the Hole	192
6.5.8	Highly Deviated Wells	193

6.6	Landing Practices	194
6.6.1	Common Landing Practices	194
6.6.2	Maximum Hanging Weight	196
6.7	Closure	199
<b>7</b>	<b>Beyond Basic Casing Design .....</b>	<b>201</b>
7.1	Introduction	201
7.2	Structural Design	202
7.2.1	Deterministic and Probabilistic Design	202
7.2.2	Design Limits	203
7.2.3	Design Comments	203
7.3	Mechanics of Solids	204
7.3.1	Index Notation	205
7.3.2	Coordinate Systems	211
7.3.3	The Continuum	215
7.3.4	Sign Convention	230
7.4	Material Behavior	230
7.4.1	Elasticity	233
7.4.2	Plasticity	235
7.5	Yield Criteria	244
7.6	Mechanics of Tubes	253
7.7	Closure	258
7.8	References	259
<b>8</b>	<b>Casing Design Performance .....</b>	<b>261</b>
8.1	Introduction	261
8.2	Tensile Design Strength	262
8.3	Burst Design Strength	263
8.4	Collapse Design Strength	269
8.5	Combined Loads	279
8.5.1	A Yield-Based Approach	279
8.5.2	Current API-Based Approach to Combined Loading	283
8.5.3	Proposed API/ISO-Based Approach	287
8.6	Lateral Buckling	290
8.6.1	Stability	290
8.6.2	Lateral Buckling of Casing	299
8.7	Thermal Effects	302
8.7.1	Temperature and Material Properties	302
8.7.2	Temperature Changes	302
8.8	Closure	309
8.9	References	309

---

<b>9</b>	<b>Casing in Directional and Horizontal Wells .....</b>	<b>313</b>
9.1	Introduction	313
9.2	Bore-Hole Friction	314
9.2.1	The Amonton-Coulomb Friction Relationship	314
9.2.2	Calculating Bore-Hole Friction	322
9.3	Curvature and Bending	329
9.3.1	Simple Bending	331
9.3.2	Effect of Couplings on Bending Stress	334
9.3.3	Effects of Bending on Coupling Performance	346
9.4	Combined Loading in Curved Well Bores	348
9.5	Closure	352
9.6	References	353
<b>10</b>	<b>Special Topics .....</b>	<b>355</b>
10.1	Introduction	355
10.2	Casing Wear	355
10.3	Expandable Casing	360
10.3.1	Expandable Pipe	361
10.3.2	Expansion Process	361
10.3.3	Well Applications	363
10.3.4	Collapse Considerations	364
10.4	Drilling with Casing and Liners	365
10.4.1	Drilling Methods with Casing	367
10.4.2	Casing as a Drill String	368
10.4.3	Casing Wear and Fatigue	371
10.4.4	Cementing	371
10.4.5	Advantages and Questions	372
10.5	Closure	373
	Index	375
